DETAILED ACTION

Allowable Subject Matter

Claims 1-20 are allowed.

Reasons For Allowance

The following is a statement of reasons for the indication of allowable subject matter: The prior art taken alone or in combination neither discloses nor makes obvious the instant process of claims as a whole. Specifically, the prior art of record, the applicant's admitted prior art of this application (AAPA) discloses a method for manufacturing an image sensor comprising (Background Art on pages 1-4 and FIG. 1 of this application): providing a semiconductor substrate (FIG. 1: 102); forming a control circuitry (FIG. 1: 104) on the substrate; forming dielectric layers (FIG. 1: 106) on the substrate; forming interconnects (FIG. 1: 108) in the dielectric layers in contact with the pixel control circuitry; forming pixel electrodes (FIG. 1: 120 and 122) in contact with the interconnects; forming an intrinsic layer (i-layer) (FIG. 1: 126) over the pixel electrodes; forming a i-layer covering layer over the i-layer; and forming a transparent contact layer (FIG. 1: 130) over the i-layer covering layer and the interconnects but fails to teach or suggest the Applicant's steps of forming a gap in the i-layer between the pixel electrodes as recited in the independent claims. The secondary reference, Lim et al. (U.S. Pub. 2002/0171083) also fails to teach the Applicant's step as mentioned above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
